Ian Plenderleith	7 years
Craig Mcleod	5 years
Terry Oliver	1 year
Dalibor Nedic	1 year

WORKSHOP FABRICATION

Since Martin Gibson has been appointed to the role of Fabrication Checker, he has found the quality and accuracy of work to be of a high standard. Well done to all and keep up the good work!

IMPLEMENTATION OF SHAREPOINT

Cays Engineering have implemented SharePoint services to centrally manage Quality Management System, Occupational Health and Safety System and Calendar sharing. Previously there were multiple copies of data stored which was inefficient and created a higher risk of data being lost or overwritten. Using SharePoint services has eliminated this by being able to store Master copies of all documents, giving read only access to staff but also being able to give Management write access so they can update and write new documents without having to copy it to multiple locations. This integrated system is another step towards continuous improvement and facilitating communication.

SAFETY

Cays would like to take this opportunity to congratulate everyone for a tremendous effort in regards to keeping our workplace safe and free from accidents for the first 6 months of this year. If we continue to look out for each other and work together we should complete the year accident free. So please continue to think safe and we will achieve this goal of an accident-free year.

NEW EMPLOYEES

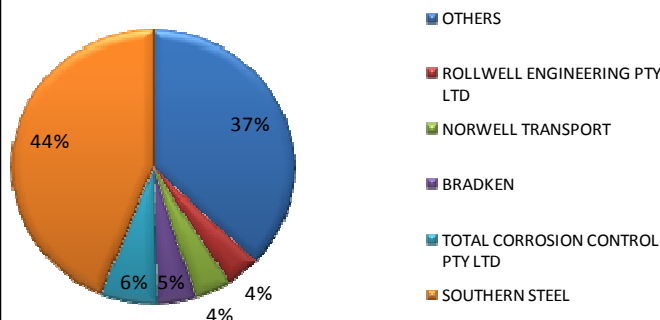

Cays Engineering welcomes Darryl Spiers, Reg Arnett and Dillon Boynes into the workshop.

WELL DONE!

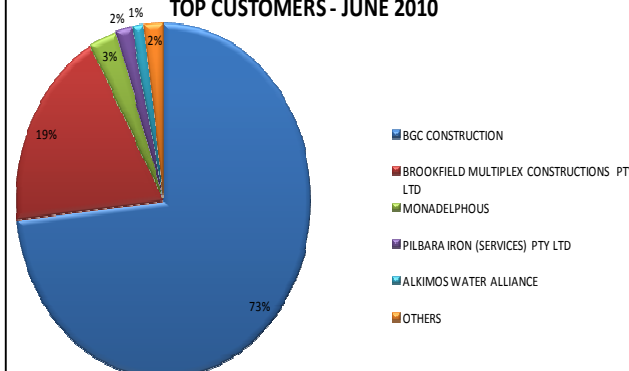

Congratulations to Mark Burchill and Brent Lewin on successfully completing the 4 year apprenticeship. Great job!
